⚠️ Mwera winds on Lake Malawi, others

Urgency: Expected

Severity: Severe

Certainty: Likely

Issued:

Sat 28 Jun 2025
09:58

Effective:

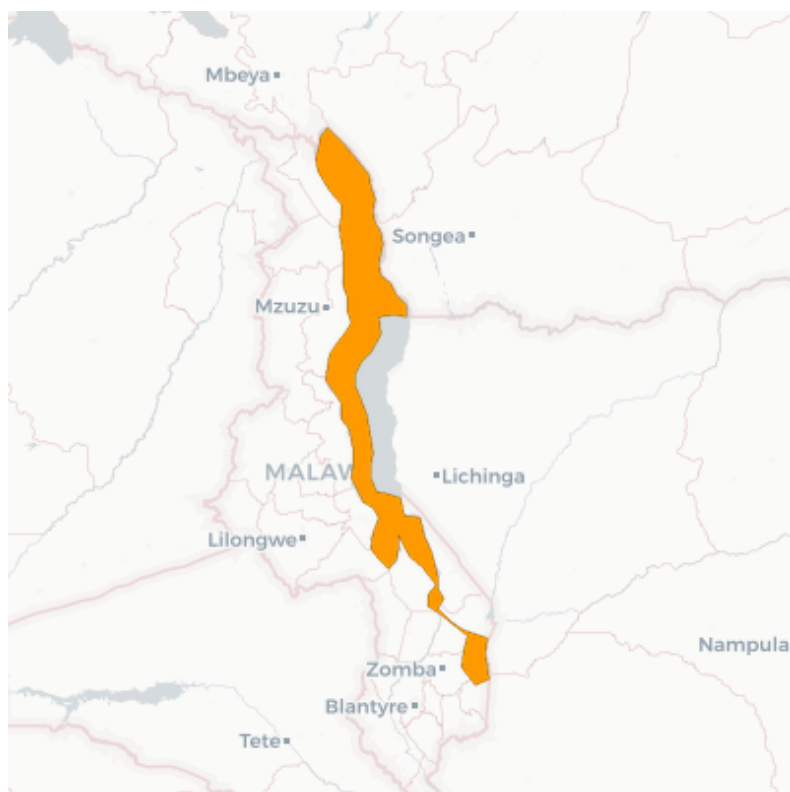

Sat 28 Jun 2025
11:00

Onset:

Sun 29 Jun 2025
16:00

Expires:

Fri 04 Jul 2025
02:00

Area:

Lake Malawi, lake Malombe, lake Chirwa,

Description:

A strong southeasterly air mass is expected to generate high and potentially dangerous water waves on Lake Malawi and other water bodies from Sunday, 29th June to Thursday, 3rd July 2025. These waves may capsize small boats, disrupt lake activities such as fishing, sailing, and swimming, and could lead to drowning and loss of life.

Instruction:

1. Avoid traveling on our lakes, especially in small boats, during this period. 2. Fishers are advised to postpone fishing trips until conditions improve. 3. Swimming and recreational activities on lakes should be suspended. 4. Secure boats and equipment

near the shoreline to prevent damage. 5. Report any emergencies to local authorities or disaster response teams. 6. All lake users should stay alert to updates from DCCMS.
