Area:

SOUTH

Description:

Heavy rainfall anticipated from 17 November 2025 is expected to bring a risk of flooding across southern areas, with conditions gradually extending northward during the week. Further flooding is likely on 20 November 2025 along the lakeshore areas as the system intensifies.

Instruction:

Clearing of drains and water channels around cities and homes to improve water flow. Avoid crossing or driving through flooded or fast flowing waters. Follow daily updates from DCCMS.
